

Telescopic Slides

Mounting Options

Information

In addition to the standard fastening of telescopic slides, with through-holes or countersunk holes, other fastening variants can be provided on request. Possible fastening types can be implemented on the inner or outer slide and in combination depending on the requirement. Some examples are shown below. Other, customer-specific special fastenings are also possible after feasibility has been checked.

Countersunk holes	Other mounting holes	Press nuts
		
Threaded studs / bolts	Mounting studs / bolts	Mounting clips
		
Mounting plates, spot-welded	Spacers, spot-welded	Support brackets, spot-welded
